

ENVIRONMENTAL POLICY

Administered By:

Marketing & Sustainability Manager

Busways Group, as a major public transport provider, seeks to make a considerable effort to minimise its impact on the environment through the efficient use of resources in the provision of large scale public transportation.

The use of heavy vehicles in the provision of public transport as well as the workshop and administration aspects of the business has an impact on the environment.

This however, is balanced by the positive impact public transport has, as a means of reducing car use, and thus private vehicle emissions.

OBJECTIVES

Busways believes that business improvement, undertaken responsibly and efficiently, will help create a sustainable future for both the business and the environment. Busways is committed to improving its environmental performance, and minimising its overall environmental impact across all areas of operation in all localities. As one of the major public transport providers in NSW, Busways recognises its opportunity to demonstrate leadership in this area.

Busways is committed to continually decrease the environmental footprint of the company through a range of strategies, addressing:

- Resource Management
- Waste Management
- Fleet Performance
- Purchasing
- Staff Engagement and Education
- Stakeholder Engagement and Education

This policy statement provides a framework for Busways Environmental Management Plan (EMP) and associated action plan, which will document the company's planning for improved environmental performance through:

- Defined Objectives
- Clear Targets
- Documented Strategies
- Allocated Responsibilities
- Measurable Performance Indicators

RESPONSIBILITIES

The Marketing & Sustainability Manager is responsible for coordinating the development and implementation of the EMP. The Manager works in co-operation with senior management and a focus group of employees from diverse departments.

REVIEW

Busways Environmental Policy will be reviewed when required by changes in legislation (or operations) and at least annually.
